Education

Manipal University Jaipur <i>Bachelor of Technology, Information Technology</i>	2023 – 2027 <i>GPA: 9.28/10.0</i>
N.S. Singhvi H.S. School <i>Higher Secondary (Science)</i>	2021 – 2022 <i>84.2%</i>
Lotus Valley School <i>Secondary Education (Class 10)</i>	2019 – 2020 <i>92.8%</i>

Technical Skills

Languages: Python, Java, C, C++, JavaScript, HTML, CSS

Frameworks & Libraries: Pandas, NumPy, Matplotlib, XGBoost, Node.js, React.js, Tailwind CSS

AI / ML: LLMs, Generative AI, Machine Learning, NLP, AI-assisted development (GitHub Copilot, Claude, ChatGPT, Cursor)

Data Structures & Algorithms: OOP, DSA, Algorithm Design & Analysis, Problem Solving

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Linux, Vercel, Tableau, MATLAB, VS Code

Core Subjects: RDBMS, Operating Systems, Software Engineering, Computer Networks, Artificial Intelligence, Machine Learning, Advanced Data Structures, Computer Vision

Experience

Internshala <i>Data Science with AI Training</i>	Aug 2024 – Oct 2024 <i>Virtual</i>
– Completed intensive hands on training in data science, machine learning, and AI, gaining practical experience in building and deploying predictive models using Python. – Developed a capstone project applying AI/ML models to a real-world business problem, integrating end to end data pipelines from ingestion to evaluation. – Explored AI tools and APIs to automate analysis workflows, reinforcing experimentation and AI-assisted development practices.	

Projects

Real Time Credit Risk Analytics Platform (CredVeda) React.js, Python, XGBoost, Tailwind CSS	Aug 2025
– Engineered an AI-driven credit risk intelligence platform delivering real time company health scores with 78% model accuracy, using XGBoost for classification and explainability features for score transparency. – Built scalable REST API and integrated a React.js frontend with an AI chatbot interface, replicating production-quality feature development aligned with agile engineering workflows. – Implemented real time financial event alerting and anomaly detection, demonstrating applied LLM and ML capabilities toward automating intelligent user experiences.	
Market Entry Decision using Predictive Modeling Python, Tableau, Excel	Aug 2025
– Developed a business analytics solution leveraging predictive modeling to evaluate market potential, forecast sales, and quantify risks for strategic market entry decisions. – Built automated data pipelines and visualization dashboards in Tableau, translating complex data-driven insights into actionable business intelligence outputs.	
Smart Vehicle Security System – Geofencing & IoT Arduino, GPS, GSM, Relay Module	Aug 2024
– Designed and built an IoT based vehicle security system leveraging GPS geofencing to track real time location and automatically control ignition upon boundary breach, achieving 99% operational accuracy.	

- Filed a patent (in process) for the geofencing architecture, demonstrating ownership of the full engineering lifecycle from prototype to formal IP submission.
- Integrated GSM communication modules for real time alert delivery, showcasing end to end embedded systems development and hardware software co design skills.

NSE Stock Market Screener | *Python, FastAPI, pandas_ta, Next.js, Tailwind CSS*

May 2026

- Engineered a production grade NSE stock screening platform that scans all NSE listed stocks daily, computing EMA 10 and Supertrend 10 crossover signals on weekly candlestick data for Buy/Sell detection.
- Built a modular FastAPI backend with a custom indicator calculation engine and PostgreSQL schema covering stocks, signals, fundamentals, and price history tables.
- Developed a responsive Next.js dashboard with dark mode, interactive candlestick charts, sector/market cap filters, signal history, real time search and deployed on Vercel.

Certifications

- **OCI Generative AI & OCI Data Science** – Oracle
- **Data Science with AI** – Internshala
- **DSA in C++** – Apna College
- **CSS & SQL (Intermediate)** – HackerRank
- **Operating System** – Red Hat Academy
- **Accenture Gold Aspire** – Accenture

Achievements

- **Dean's List of Excellence (×6)** – Manipal University Jaipur; maintained GPA above 9.0 across five consecutive semesters.
- **Level 2 Qualifier – Deloitte Hacspllosion Hackathon**; advanced through competitive rounds by delivering a functional technical solution under high-pressure engineering constraints.
- **Participant – Smart India Hackathon**; developed scalable software solutions for national-level engineering challenges.
- **Patent Filing (in process)** – Geofencing-based Smart Vehicle Security System.
